Notes for JavaScript

ECMA script -

ECMA script is a standard on which JavaScript is based. It was created to ensure that different documents on JavaScript are actually talking about the same language .
JavaScript & ECMA script can always be used interchangably JavaScript is very liberal in what it allows
.

How to execute JavaScript ?

--> inside browser
--> to execute JavaScript is a runtime lke Node.js , which can be installed and used and used to run JavaScript code
--> by inserting <script> tag of an HTML document.
